## A MESSAGE FROM PRINCIPAL

*Dr. S. Ravi Kumar, PhD, SITS*

At SITS my vision is to touch the culmination of development in all aspects. Immediate objective before me is to establish the required laboratories in all departments and guide our faculty team to do their best.

I want to integrate my experience in teaching, industry and research in to the learning systems and direct the collective effort of the faculty to build a comprehensive teaching methodology.

We have introduced the proctor system to monitor the progress of a student individually. Through this issue of SUPRAJA TIMES, I want to advise the students to attend the classes regularly and communicate their academic related problem (s) to respective faculty or me.

We have many plans and dreams in the years to come. We propose to introduce the academic inspection and auditing at regular intervals

in all the departments, by the subject experts. This will ensure the quality of teaching and the steps required to be taken to improve the teaching standards.

I feel that we are successful in our duty, when a weak student from a rural background progresses steadily from poor performance to good performance and moves toward excellence.

I certainly hope that the sincerity in our efforts, the nobleness of our dreams and clarity in our vision will facilitate itself in the form of making this institute a prestigious one not only in this district but in entire Andhra Pradesh.

## GUEST OF THE MONTH

The students and staff welcomed our guests of the month Dr. Avasara Seshagiri Rao (Ret. Head & Prof. of Physics, JNTU), Smt. A. Kantham and Mr. Panuganti Chiranjeevi (Director, Intergraph, India) to SITS. Dr. CSP Rao (Professor, NIT) also participated in welcoming the guests.

It is so ironic that many of our founding members and their family including Mr. Chiranjeevi Panuganti (Intergraph), Dr. CSP Rao (NIT Warangal), Ms. Lata Kunapuli, Mr. Mahesh Rachakonda, Mr. Raghavan Peketi were Dr. Seshagiri Rao's students at JNTU, Kakinada.

The guests interacted with students and staff and encouraged them to work hard. They

reminded the students the importance of basic sciences in their career and not to have any subject backlogs. Later on, they have inspected the college premises.

## UPCOMING EVENTS:

- 1 Y Supple. Exams begins for II Y Students on Dec 2, 2010.
- 1 Y Supple. Exams End for II Y Students on Dec 15, 2010.
- I/I Mid Exams on Dec 20, 21, 22, 2010.
- Student Club Open Enrollment in Dec, 2010
- Next issue of Supraja Times will be Jan 1, 2011.

## TOGETHER WE SHALL SUCCEED

By Swamy Avasarala, ME, PE

We do not choose who our colleagues are going to be in an organization. Neither do we have control over others behavior, desires, and emotions. However, we CAN choose the way we live, interact and solve our problems and our conflicts.

We can be working at a college, university, government organization, private industry or in a factory... We can be born into a Hindu family, into a Christian or into a Muslim family or into any caste... We can be born into a wealthy family or into a household with limited financial resources ..., at every place these days, we have seen corruption, selfishness, and conflicts.

But conflicts need not be resolved by using violence or cheating or by bringing down or crushing the other side. All these options leads to a lose-win or a lose-lose situation, but never to a win-win situation for the parties involved.

Whether it is separate statehood for Telangana, aspirations for positions in new Andhra government, illegal land dealings in Karnataka and Mumbai, corruption in awarding 2G spectrum and commonwealth games, recent developments at various educational institutions, or subprime mortgage dealings in recent past in USA, it is never a win-win situation. All these incidents have one common thread, i.e., greed, selfishness, dishonesty, opaque and inconsideration.

It seems that in conflicts, all sides involved are shouting louder and louder without listening to each other. These actions have increased the polarization of the societies. In such situations, individuals as well as communities tend to close themselves to the "other". We have stopped trusting our own family members, colleagues, and our government.

Prejudice and hatred thrive in such an environment. Violence, cheating, dishonesty and opaqueness are making more and more victims as the days go by.

During my recent trip to our college, I was going in a taxi along with CAO and AO of SITS from Kazipet to SITS College. The driver stopped at the railway crossing as the train is passing by. Inadvertently the hand break was released and our taxi gently rolled back colliding the car behind. As such there was no damage to either of the cars. But the driven from the car behind immediately came out and dragged our taxi driver and started slapping him with verbal abuse. This small incident reminded me of how narrow minded, selfish and inconsiderate we have become as a society.

Is it a self-fulfilling prophecy of failure? Is the situation then totally hopeless? In view of the current situation throughout the world, most people will say "yes" but the possibility of finding a common ground, peaceful solution to the conflicts, eradicating corruption is real.

The answer to this question must lie at our college with our young and energetic students, our staff and the management. The answer has to be team work, understanding one another, respecting other's opinion, caring for others, and working for collective benefit, thereby protecting our citizens, organization and our nations. *We can start this process by simple actions at the grassroots level, by using words as simple as "we, us, our," instead of "I, me, mine".*

A few decades ago, a famous American president named John F. Kennedy gave a great speech and I quote *"ask not what your country can do for you - ask what you can do for your country. My fellow citizens of the world: ask not what*

*America will do for you, but what together we can do for the freedom of man".*

It is **together** we can improve our organization, by trusting our colleagues, making our actions transparent and always standing by the truth.

In this endeavor, the management of Somanatha Education Society promises our staff and the students that we will lead by example, nurture and prepare them for the new world, not only as good engineers but also as good citizens. After all, it is these students who will be our future entrepreneurs, scientists, engineers, administrators, teachers, politicians and leaders of the world.

So today I ask everyone to take an oath and say **"Together we shall succeed"**.

*"ask not what your country can do for you - ask what you can do for your country. My fellow citizens of the world: ask not what America will do for you, but what together we can do for the freedom of man".*

*By John F. Kennedy*

**STUDENT OF THE MONTH**

*Yanagandula Anush Reddy, II Year, ECE*

Y. Anush Reddy is second year ECE student. He was chosen as the *student of the month* for being one of the most active students in the college. He has taken photographs during the SITS annual college day and contributed them for publication in Supraja Times article in November, 2010 edition.

He has one sister and his parents are Mr. Y. Thirupathy Reddy and Smt. Y. Rajitha. He states that he is 'very proud and happy' for being selected as student of

the month. In his spare time he likes to play caroms, listen to music and refer to different subject books. Upon completion of his engineering, he wants to pursue masters degree either in electronics or management and pursue career in civil service there after.

**STUDENT OF THE MONTH**

*Lingala Vasavi Reddy, I Year, ECE*

L. Vasavi Reddy is 1st year ECE student. She was chosen as the *student of the month* for being active in the English lab program and exhibiting leadership qualities.

She has one brother and one sister and her parents are Mr. Ramakrishna Reddy and Smt. Umadevi. She states that she is 'happy' for being selected as student of the month. In her spare time she likes to play, read books, watch TV, and chat with

friends and think about her future and the country. Her favorite sports are Vollyball, Kabaddi and Cricket. Upon completion of her engineering, she wants to pursue masters degree in London. Later on she likes to pursue IPS and contribute for the welfare of the poor and the country.

**STAFF OF THE MONTH**

*A. Chaitanya, EEE*

Miss Chaitanya is Assistant professor in EEE Department. She enjoys teaching and believes that it will enrich her skills and will be useful for her future career.

In her spare time she likes to read books, watch TV

and play with children. She has been teaching EEE subjects for the past two years. She likes to pursue M.Tech degree in future.

**"Personality development including extra-curricular activities is equally important as academic achievement"**

**STUDENT CLUBS**

The Supraja Institute of Technology & Science is proud to announce the coordinators for various clubs. Students are encouraged to contact the club (s) coordinators of their interest to enroll. Funding for the operation of the clubs will be provided by Aver Technologies, Inc. and other sponsors.

# SUDOKU

## SOLVING DIRECTIONS

To solve a Sudoku puzzle, place a number into each box so that each row across, each column down, and each small 9-box square within the larger diagram (there are 9 of these) will contain every number from 1 through 9. In other words, no number will appear more than once in any row, column, or smaller 9-box square. Working with the numbers already given as a guide, complete each diagram on the next two pages with the missing numbers that will lead to the correct solution.

## GETTING STARTED

Look at the ninth column of the example puzzle below. There are clues in the puzzle that will tell you where, in this column, the number 3 belongs.

The first clue lies in the eighth column of the diagram. There is a 3 in the fifth box. Since numbers can't be repeated in any 3 x 3 grid, we can't put a 3 in the fourth, fifth, or sixth boxes of the ninth column.

We can also eliminate the bottom three boxes of the ninth column because there's a 3 in that 3 x 3 grid as well. Therefore, the 3 must go in the second or third box of the ninth column.

The final clue lies in the second row of the diagram, which already has a 3 in it. Since numbers can't be repeated within a row, there's only one box left for the 3 — the third box of the ninth column.

Continue in this manner, using the same type of logic and elimination, until the puzzle grid is completely filled in.

EXAMPLE

		7	9					1
	2	3	8			6	7	
		6		2	7			
	7	8		5				
	5		2		6			3
				1		9	5	
			6	3		8		
	8	4			9	2	1	
2					1	3		

EXAMPLE SOLUTION

8	4	7	9	6	3	5	2	1
1	2	3	8	4	5	6	7	9
5	9	6	1	2	7	4	8	3
9	7	8	3	5	4	1	6	2
4	5	1	2	9	6	7	3	8
6	3	2	7	1	8	9	5	4
7	1	9	6	3	2	8	4	5
3	8	4	5	7	9	2	1	6
2	6	5	4	8	1	3	9	7

	9	3			8		2	6
6		5			2			3
		7		5	6	4		
9	7		4			1	6	
4			5	6	9			8
	3	6			7		4	2
		1	8	9		6

9		2		8		6	3	
				2	8		5	1
1	9			7			8	3
2	5		3	1				
	7	9		4		3		6
	2		5		3		7	4
4		3	7		1	5		

**STUDENT CONTRIBUTIONS**

*S. Pavan Kumar, 1 year, ECE*

**Joke: SEMESTER OFFER**

Take a slip to the exam hall, show it to your nearest teacher, win a free trip to the principal's room and enjoy unlimited holidays.

**Article: The End of the World in 2012**

World is going to end in the year 2012. These words are said not by common man but the world's popular scientists. As there are destructive problems such as global warming, sea pollution etc. the burning question the world is facing is "Global Warming".

Global warming. "What does it mean?" It is nothing but as our earth receives sun light from the sun, earth absorbs some heat and some percent is reflected back to the atmosphere and earth maintains stabilized temperature. But, due to heavy pollution, heat is increasing gradually, as the ice bergs in Himalayas are breaking. As the ice bergs break water in the sea level increases, resulting in the reduction of "biosphere". As the land reduces mankind will be in problematic position to survive. This is all about "Global Warming".

Its time we thought of the ways to solve this problem and ensure the survival of the mankind. To reduce the global warming we must urgently protect nature. Protection of the nature is the only solution for this gigantic disaster. We should increase area of forest and protect the wildlife from extinction. There are number of predictions that the world is going to end in 2012 by. But, our scientists are searching for other planets in the universe for the survival of the mankind.

*J. Hemanth, 1 year, EEE*

**The Philosophy of the Month:**

I asked for **strength** and God gave me **difficulties** to be faced.

I asked for **wisdom** and God gave me **Problems** to solve.

I asked for **courage** and God gave me **danger** to overcome.

I asked for **love** and God gave me **people** to be helped.

I asked for **favor** and God gave me **opportunities**.

I received nothing I wanted, but, I received everything I needed.

**"Man Proposes God Disposes"**.

**Thought of the Month:**

**"Birth and background** have nothing to do With a person's greatness

**Constant efforts** of him only will make a person great" - **Lord Buddha**

"Your **birth** may be **common**,

But, **death** must make **history"**

- **Adolf Hitler**

**SUDOKU ANSWER KEY (PG. 4-5)**

1.
